

# ePMP™ 3000 Series

## QUICK LOOK:

- **High-performance, scalable and reliable access points for fixed wireless broadband**
- **ePMP 3000 features MU-MIMO for up to 1.2 Gbps capacity for more than 120 Subscribers**
- **Low TCO with three-year hardware warranty**
- **Interoperable with all Force 300 Subscriber Modules and supports backward compatibility to Force**

Cambium Networks' ePMP product line has set the standard for high performance, scalability and reliability in harsh interference environments, all at a compelling price. The ePMP 3000 Access Point series is the third generation based on 802.11ac Wave 2 technology. ePMP 3000 Access Points interoperate with Force 300 Subscriber Modules (SM) and supports backward compatibility. ePMP 3000 Access Points can deliver up to 600 Mbps aggregate to each Force 300 SM. A sophisticated scheduling and QoS engine combined with TDD synchronization allows the ePMP 3000 and 3000L to deliver consistently high-quality service plans to a large number of end users.

All ePMP 3000 Access Points are managed with cnMaestro™, and networks can be planned with LINKPlanner. Both are available from Cambium Networks at no charge.

### ePMP 3000

The flagship product is the ePMP 3000, which can deliver 1.2 Gbps serving 120 or more subscribers. Featuring 4x4 MU-MIMO and dual overlapping sectors, the ePMP 3000 can transmit to two SM's at the same time. This effectively doubles the capacity of 2x2 systems and

in the process, increases link budgets by 3 dB with downlink beamsteering. The ePMP 3000 can be fitted with either a 90° MU-MIMO sector or a 60° MU-MIMO horn antenna. An optional smart uplink beamsteering antenna can be added for additional uplink isolation. For additional interference mitigation, the ePMP 3000 supports dynamic filtering for neighboring channel interference. With TDD synchronization, ePMP 3000 networks can scale to thousands of end users leveraging a small number of channels.

### ePMP 3000L

The ePMP 3000L is a 2x2 MIMO Access Point that delivers up to 600 Mbps to as many as 64 end users. The ePMP 3000L supports GPS synchronization for mitigating self-interference and increasing subscriber density. The ePMP 3000L can be deployed with either the 90° MIMO sector antenna or any third-party 2x2 horn, dish or sector antenna.

### ePMP 3000 MicroPOP

The ePMP 3000 MicroPOP can be deployed as a complement to the ePMP 3000 or ePMP 3000L for low-density, short-range applications as a hole filler or to inject capacity in a small area. The MicroPOP has an integrated omni antenna but does not support synchronization.

## ePMP™ 3000 Series

Spectrum and Interface			
	3000	3000L	MP 3000 MicroPOP
<b>Channel Width</b>	20   40   80 MHz	20   40   80 MHz	20   40   80 MHz
<b>Proprietary Physical Layer</b>	4x4 MUMIMO/OFDM	2x2 MIMO/OFDM	2x2 MIMO/OFDM
<b>Channel Spacing</b>	Configurable in 5 MHz increments	Configurable in 5 MHz increments	Configurable in 5 MHz increments
<b>Frequency Range</b> <small>(Note: Allowable frequencies and bands are dictated by individual country regulations.)</small>	Wide Band Operation 4910 - 5970 MHz	Wide Band Operation 4910 - 6135 MHz	5150 - 5875 MHz
<b>MAC Layer (Media Access Control)</b>	Cambium Proprietary	Cambium Proprietary	Cambium Proprietary
<b>Ethernet Interfaced</b>	100/1000 BaseT, rate auto negotiated, 802.3at compliant & Aux SFP port	100/1000 BaseT, rate auto-negotiated	100/1000 BaseT, rate auto-negotiated
<b>Supported Powering Methods</b>	56 V PoE (included), standard 802.3at PoE Supply, or CMM5 with 56 V and 5 pin to 7 pin cross over cable adapter	29 V Cambium PoE (included)	802.3af or 802.3at Powered Device; 56 VDC Passive PoE Injector (included)
<b>Protocols Used</b>	IPv4/IPV6 , UDP, TCP, IP, ICMP, SNMPv2c, HTTPs, STP, SSH, IGMP Snooping	IPv4/IPV6 , UDP, TCP, IP, ICMP, SNMPv2c, HTTPs, STP, SSH, IGMP Snooping	IPv4/IPV6 , UDP, TCP, IP, ICMP, SNMPv2c, HTTPs, STP, SSH, IGMP Snooping
<b>Network Management</b>	HTTPS, SNMPv2c, SSH	HTTPS, SNMPv2c, SSH	HTTPS, SNMPv2c, SSH
<b>VLAN</b>	802.1Q with 802.1p priority	802.1Q with 802.1p priority	802.1Q with 802.1p priority
Performance			
	3000	3000L	MP 3000 MicroPOP
<b>Subscribers per Sector</b>	Up to 120	Up to 64	Up to 32
<b>ARQ</b>	Yes	Yes	Yes
<b>Nominal Receive Sensitivity (w/FEC) @20 MHz Channel</b>	MCS 0 , -92 MCS 8 supported by Wi-Fi -68	MCS 0 = -89 dBm to MCS 8 (256 QAM-3/4) = -66 dBm (per chain)	MCS 0 = -89 dBm to MCS 8 (256 QAM-3/4) = -66 dBm (per chain)

### ABOUT CAMBIUM NETWORKS

Cambium Networks empowers millions of people with wireless connectivity worldwide. Its wireless portfolio is used by commercial and government network operators as well as broadband service providers to connect people, places and things. With a single network architecture spanning fixed wireless and Wi-Fi, Cambium Networks enables operators to achieve maximum performance with minimal spectrum. End-to-end cloud management transforms networks into dynamic environments that evolve to meet changing needs with minimal physical human intervention. Cambium Networks empowers a growing ecosystem of partners who design and deliver gigabit wireless solutions that just work.
